

## CLAIMS

What is claimed is:

1. A polycarbonate-based nonflammable resin composition, characterized by containing:

- 5           a. a polycarbonate-based resin (A-1);  
             b. a phosphoric ester (B) expressed by the following formula:

where R<sup>1</sup>, R<sup>2</sup>, R<sup>3</sup>, and R<sup>4</sup> are each independently a C<sub>1</sub> to C<sub>30</sub> hydrocarbon; X is a C<sub>1</sub> to C<sub>30</sub> divalent organic group that may contain an oxygen atom and/or a nitrogen atom; and m is an integer from 0 to 5);

- 15           c. an alkoxy group-containing organopolysiloxane (C) expressed by the following average compositional formula:

where R<sup>1</sup> is a substituted or unsubstituted univalent hydrocarbon group containing an aryl group as an essential component; R<sup>2</sup> is a substituted or unsubstituted univalent hydrocarbon group; R<sup>1</sup> and R<sup>2</sup> may be the same as or  
 20 different from each other; 0.2 ≤ a ≤ 2.7; 0.2 ≤ b ≤ 2.4; and a + b < 3,

wherein

said phosphoric ester (B) being contained in an amount of 0.5 to 20 weight parts and said alkoxy group-containing organopolysiloxane (C) in an amount of 0.05 to 20 weight parts per 100 weight parts of the polycarbonate-based resin (A-1).  
 25

2. A polycarbonate-based nonflammable resin composition, characterized by containing:

- a. a polycarbonate-based resin (A-1);

b. a thermoplastic resin (A-2) other than a polycarbonate-based resin;

c. a phosphoric ester expressed by the following formula:

where R<sup>1</sup>, R<sup>2</sup>, R<sup>3</sup>, and R<sup>4</sup> are each independently a C<sub>1</sub> to C<sub>30</sub> hydrocarbon; X is a C<sub>1</sub> to C<sub>30</sub> divalent organic group that may contain an oxygen atom and/or a nitrogen atom; and m is an integer from 0 to 5; and

10 d. an alkoxy group-containing organopolysiloxane (C) expressed by the following average compositional formula:

where R<sup>1</sup> is a substituted or unsubstituted univalent hydrocarbon group containing an aryl group as an essential component; R<sup>2</sup> is a substituted or unsubstituted univalent hydrocarbon group; R<sup>1</sup> and R<sup>2</sup> may be the same as or different from each other; 0.2 ≤ a ≤ 2.7; 0.2 ≤ b ≤ 2.4; and a + b < 3,

wherein

said phosphoric ester (B) being contained in an amount of 0.5 to 20 weight parts and said alkoxy group-containing organopolysiloxane (C) in an amount of 0.05 to 20 weight parts per combined 100 weight parts of the polycarbonate-based resin (A-1) and the thermoplastic resin other than a polycarbonate-based resin (A-2).

25 3. A polycarbonate-based nonflammable resin composition as defined in Claim 1 or 2, characterized in that the phosphoric ester is bisphenol A-tetraphenyl diphosphate (BPADP) or bisphenol A tetracresyl diphosphate.

10004978-120304

4. A polycarbonate-based nonflammable resin composition as defined in Claim 1 or 2, wherein the weight average molecular weight of the alkoxy group-containing organopolysiloxane (C) is between 300 and 6000.

Sub A1 5 5. A polycarbonate-based nonflammable resin composition as defined in any of Claims 1 to 4, characterized in that the alkoxy group-containing organopolysiloxane (C) includes a branched structure.

10 6. A polycarbonate-based nonflammable resin composition as defined in any of Claims 1 to 5, characterized in that the alkoxy group-containing organopolysiloxane (C) contains substantially no silanol groups (SiOH).

15 7. A polycarbonate-based nonflammable resin composition as defined in any of Claims 1 to 6, characterized in that R<sup>1</sup> of the alkoxy group-containing organopolysiloxane (C) is a methyl group, ethyl group, or phenyl group, and the phenyl group content is at least 20%.

20 8. A polycarbonate-based nonflammable resin composition as defined in any of Claims 1 to 7, characterized in that R<sup>2</sup> of the alkoxy group-containing organopolysiloxane (C) is a methyl group or ethyl group.

9. A polycarbonate-based nonflammable resin composition as defined in Claim 2, characterized in that the thermoplastic resin (A-2) is one or more types of resin selected from the group consisting of:

25 polymers including as a structural component (a) an aromatic vinyl monomer component;

copolymers including as structural components (a) an aromatic vinyl monomer component and (b) a vinyl cyanide monomer component;

10004978 120301

copolymers including as structural components (a) an aromatic vinyl monomer component, (b) a vinyl cyanide monomer component, and (c) a rubber-like polymer;

aromatic polyesters;

5 polyphenylene ethers;

polyether imides; and

polyphenylene sulfides.

- 10 10. A polycarbonate-based nonflammable resin composition as defined in Claim 9, characterized in that the thermoplastic resin (A-2) is one or more types of resin selected from the group consisting of ABS resins, AES resins, ACS resins, AAS resins, and polystyrene resins.

- 15 ~~11. A polycarbonate-based nonflammable resin composition as defined in any of Claims 1 to 10, characterized by further containing (D) an anti-drip agent in an amount of 0.01 to 10 weight parts per 100 weight parts of the polycarbonate-based resin (A-1) or per combined 100 weight parts of the polycarbonate-based resin (A-1) and the thermoplastic resin (A-2).~~

- 20 12. The polycarbonate-based nonflammable resin composition as defined in Claim 11, characterized in that the anti-drip agent is polytetrafluoroethylene (PTFE).

- 25 ~~13. A polycarbonate-based nonflammable resin composition as defined in any of Claims 1 to 12, characterized by further containing (E) an alkali (alkaline earth) metal salt of a perfluoroalkanesulfonic acid in an amount of 0.01 to 3 weight parts per 100 weight parts of the polycarbonate-based resin (A-1) or per combined 100 weight parts of the polycarbonate-based resin (A-1) and the thermoplastic resin (A-2).~~

Sub A3  
cont.

15. A polycarbonate-based nonflammable resin composition as defined in Claim 14, characterized in that the epoxy-based stabilizer (F) is 3,4-epoxycyclohexylmethyl-3',4'-epoxycyclohexanecarboxylate or bis-(3,4-epoxycyclohexyl) adipate.

Subaru

16. An electrical or electronic device part formed from a nonflammable resin composition as defined in any of Claims 1 to 15.
17. A molded article composed of a nonflammable resin composition as defined in any of Claims 1 to 15.
